

Zonar<sup>®</sup> Integration

## Hassle-free pre- and post-trip inspections with automated issue resolution

Squarerigger has teamed up with ZONAR Systems, the leading provider of RFID-based inspection management systems to provide an end-to-end solution ensuring that issues reported during drivers pre and post-trip inspections are logged into Squarerigger's SQ.7 Fleet Maintenance System.

### ZONAR<sup>®</sup> integration

- Helps ensure that drivers and other inspection personnel actually perform required inspections.
- Transfers both non-critical and "down the vehicle" defect reports to SQ.7, automatically.
- Works with SQ.7's Work Request system to provide an immediate notification of reported problems.
- Allows fast, simple assignment of work to technicians.
- "Repair complete" notice is sent immediately upon Work Order completion.
- Provides a complete solution for simple, effective inspection management across your fleet.
