

## Automatically Import Inspection Results

Seamlessly add maintenance tasks into your fleet maintenance system to ensure that repairs are performed on a timely basis.

### A TRANSFINDER/ZONAR SYSTEMS INTEGRATED SOLUTION

Scheduling inspections and importing results into your fleet maintenance software automatically adds to your work queue.

By combining the accuracy and timeliness of Zonar's Electronic Vehicle Inspection and Reporting (EVIR) system and Transfinder's fleet maintenance software, Servicefinder, you will reduce paperwork and the potential risk of missing critical repairs.

#### With this integrated solution, you can:

- Ensure that more of your school buses stay in service;
- Identify critical repair requirements;
- More easily manage your preventative maintenance program;
- Maintain your fleet in top performance; and
- Sustain the life of your vehicles

This powerful option ensures that inspection results are imported automatically into Servicefinder, which is designed solely for meeting school bus maintenance challenges and requirements.

Contact us to learn more about how this option will keep your school bus fleet in peak performance.
