STUDENT TRACKING SOLUTIONS

ZPass™

Patented Real-Time, Web-Based Student Tracking *Only* with ZPass™

The wait is over for a student tracking solution that really works. ZPass is what you have been asking for.

Answers: Are immediate with the only web-based solution.

Accuracy: Tracks boarding effectively with card and reader.

Affordability: With Zonar's proven RFID technology.

Administrators, drivers, parents and students all benefit with ZPass. At last, the capabilities commensurate to the responsibility.

- 1 Student entering and exiting the bus swipes his/her ZPass ID card.
- 2 As the student enters/exits the bus, the ZPass reader returns audible and visual signals confirming the student's card was read with entry and exit time and location recorded.
- 3 The ridership data is immediately and securely transmitted to Zonar's web-based Ground Traffic Control™ for administrative alerting and reporting.

CAPABILITIES COMMENSURATE TO THE RESPONSIBILITY

ZPass™ System

Zonar's patented ZPass system is Simple, Safe and Secure. It delivers unprecedented performance and accuracy without impeding the normal loading and unloading process. Each student is issued a unique RFID card to carry. The student swipes their ZPass ID card when entering or exiting the bus and the time, date and location is logged and immediately transmitted to a secure database. This ridership data is then accessible via a web-browser with Zonar's Ground Traffic Control application.

School Officials, Parents and Students All Gain

- **Bus Report** - Provides all student ridership data by bus or route
- **Versatility** - Reads various passive RFID proximity cards
- **Security** - Student information is available only to those who need to know
- **Student Report** - Stamps time and date for all loading and unloading activities by student
- **Patented, Web-Based Reporting** - Makes it fast and easy to access accurate, timely information

Now student ridership can be monitored in a safe and non-intrusive way. Parents and school officials can have answers easily, immediately and cost-effectively.

ZPass+™

With ZPass+, parents have access to the same information the school uses to answer questions about bus rides. Simple notifications of where and when their child gets on or off the school bus are sent to parents directly by cell phone text message or push notifications. Parents can also view their child's bus ride data via a password-protected website and smart phone application. This simple solution gives parents the peace-of-mind that comes with knowing their child is safe and there is no additional action from students or bus drivers!
