GROUND TRAFFIC CONTROL™: ZING™ MODULE

ZONAR INTELLIGENT NAVIGATION AND GUIDANCE

ZING is a revolutionary web-based dispatch, route management, navigation and two-way messaging application used by drivers and dispatchers. It utilizes Zonar's Ground Traffic Control software and the 2010 inspection tool or Garmin® nuvi® for real-time communication between dispatch and drivers.

FEATURES AND BENEFITS: DISPATCH, NAVIGATION AND ROUTE MANAGEMENT

- **Compatible** - With ALL routing applications and ESRI maps.
- **Custom Routes** - Build, import and save your routes.
- **Directions** - Provides turn-by-turn driving directions.
- **Interaction** - Intuitive driver and dispatch interfaces.

FEATURES AND BENEFITS: TWO-WAY MESSAGING

- **Safe Messaging** - Mitigates driver distraction.
- **Broadcast** - To "all," "group" or "single" recipients. Custom predefined and free form messages.
- **Design** - Leverages existing system components. Modular design scales with need.
- **Affordable** - Reduces dependence on more costly radios and cell phones.

ZING leverages the familiar look and feel of Zonar's suite of award winning productivity solutions so fleets are up and running with ease. Realize the performance edge ZING delivers as a powerful communication link between drivers and dispatchers.
