

# myBUSvue™

with Parents and Schools in Mind

## PLAN

up-to-date bus location and ETA

## REDUCE

parent calls and complaints

## VISIBILITY

track bus route behavior in real-time

## STREAMLINE

automate rider counts for reporting

### How does MyBusVue™ work?

MyBusVue is a smart phone app available for free download. Parents use a secure log-on to view real-time location of their child's bus. Up-to-the-minute information can also be viewed by online portal. There is no more guessing where a bus is in-route—minimizing daily parent calls.

### MyBusVue™ + Z Pass™

When combined with the Z Pass student rider system, MyBusVue also displays when and where each child boarded and exited the bus, where, as well as arrival and departure times at each school location.

### About Z Pass™ Rider Visibility

With Z Pass, each student is issued a unique RFID card for quick scanning when boarding or exiting the bus. Schools now know the time, date and GPS location of every child's entry and exit from the bus, enabling easy real-time child search and rider counts for optimized routing and automated state and federal reporting.

Z Pass RFID cards can be extended to administer student ID, lunch payment accounts or library card programs.

### Key Features of MyBusVue:

- Interactive map with live updates
- Check on bus ETAs, in-route progress and stops completed
- Follow multiple riders and stops
- Secure access code and log-in
- Free mobile app download
- Online web portal
- Additional Features with Z Pass:
  - Real-time notifications of rider scans
  - Automated state and federal reporting
  - Streamlined reimbursement process
  - Easy child check
  - Increased student safety
