

Smart Fleet Technology for Commercial Fleets

Safely delivering loads on time, at the lowest cost, is critical to your operation. Zonar's comprehensive telematics platform provides the tools and data to maximize fuel efficiency, improve uptime, increase safety and ensure compliance.

Maximize Fuel Efficiency

Zonar's [V3™ telematics platform](#) utilizes the powerful combination of our high-definition GPS data and OEM-grade ECM connectivity to provide accurate fuel consumption and idle information. Fleet managers easily identify the routes, vehicles, and driving behaviors that are most and least fuel efficient.

Increase Vehicle Uptime

Prevent breakdowns and ensure on-time deliveries with Zonar's patented, [Electronic Verified Inspection Reporting](#) (EVIR®) and remote engine diagnostics. Fleet managers and maintenance personnel have immediate access to defects identified during visual inspections as well as engine fault codes and diagnostic alerts.

Improve Driver Behavior

Improve driving performance and safety with real-time visual driver performance feedback and unparalleled management reporting. Set warning thresholds for speed, idle, and hard braking to visually notify drivers in the cab and reward safe driving habits. Zonar's innovative [ZFuel™](#) reporting platform provides detailed driving efficiency data to help you compare performance over varied terrain, driving behaviors and vehicle types.

Ace Regulatory Compliance

Zonar's patented commercial tracking and mobile devices collect, organize, and analyze mandated data for you, so you can focus on the road ahead. Zonar's Hours of Service application ([Zonar Logs™](#)) is the easiest to use electronic logging device available and with the patented EVIR application, you can easily maintain compliance.

From safety to security to efficiency—isn't it time to bring your fleet up to speed with Zonar?

Experience Innovation with Zonar Solutions

Zonar V3™ GPS Technology

- High-definition GPS tracking
- Remote diagnostics keep vehicles on the road
- Track fuel consumption for detailed fuel use and idle costs
- Supports advanced UDS protocol and meets or exceeds OEM specifications

Zonar Ground Traffic Control® Web-Based Fleet Management Application

- Access real-time fleet operations data through a secure Internet connection
- Receive instant alerts to ensure fleet is operating in acceptable parameters
- Open API provides seamless integration with other software and systems
- Automate tasks that once were a burden on drivers, dispatchers and back-office staff
- Ensure maximum safety, transparency and utilization optimization with insight into driver speeds, path, safety and route performance

Zonar ZFuel™ Fuel Efficiency Tracking

- Available in Ground Traffic Control, ZFuel allows fleet managers to leverage high-density fleet data to reward drivers following best practices

Zonar Connect™ Next-Generation Tablet

- Always connected with LTE, Wi-Fi and Bluetooth
- Integrate with Zonar and third-party software
- Built on a scalable Android™ platform and capable of over-the-air software updates

ZTrak® Asset Tracking

- Attaches easily with bolts and magnets to quickly locate equipment and assets
- Sealed and ruggedized to withstand extreme temperatures, dust, rain, sleet and snow
- Superior internal antennae for both cellular and GPS communications

API Integration

- By working with key software solutions companies who have successfully completed Zonar's review process, we are able to deliver to our partners a complete integrated solution that will deliver outstanding business results — from maintenance, diagnostic, planning, and telematics providers to solution integrator.
