## Increase Fuel Tax Savings with Intelligent Compliance

### Enhance Your Fleet Operation

With the Zonar-Fleetworthy integration, automatically capture precise vehicle and fleet data, reduce vehicle inspection reporting and hours of service (HOS) paperwork processing times, and reclaim IFTA / IRP and PTO fuel tax refunds with ease and confidence. Building on the 30-year ITS Compliance legacy, Intelligent Compliance is Fleetworthy's proprietary approach to exceptional customer service, advanced technologies and unmatched industry expertise to help your fleet succeed beyond compliance standards.

### Benefits

- Save administrative time processing inspection reporting data, HOS driver logs, and IFTA / IRP
- Reduce audit liability with electronic GPS and historical data
- Potentially reclaim substantial off-road miles and PTO fuel tax refunds
- Ensure accurate pre- and post-trip inspections

## How It Works

Together, Zonar and Fleetworthy help you avoid manual data collection processes and fees, proactively lower audit risk and fines, streamline reporting and realize potential substantial savings in fuel tax reporting and reimbursement. Zonar's technology accurately captures required pre- and post-trip inspection, vehicle location, mileage, hours of service, performance data, and more through its onboard Connect™ tablet, V3™ telematics unit and patented Electronic Verified Inspection Reporting (EVIR®) solution.

Using real-time data collected directly from Zonar, Fleetworthy's process for reviewing, analyzing and making key data available through the appropriate reporting functions is streamlined considerably, saving your organization valuable time, money, and resources. The process uses Fleetworthy's online platform, COMPLY 2.0, which rationalizes and displays data via an online dashboard giving full visibility into exceptions, falsifications and omissions. Companies gain actionable insight and confidence that they're compliant if audited.

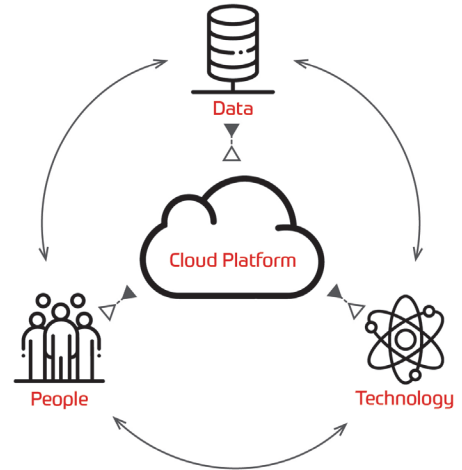

### DOT Risk Management + Safety Compliance Data

DOT risk management and safety compliance data is added to your compliance dashboard and available immediately for administrative reporting.

### IFTA / IRP Reporting and Reimbursement

Data required for necessary fuel tax reporting and reimbursement is analyzed to ensure the data meets necessary IFTA and IRP reporting requirements, before being electronically readied for quarterly claims.
